PROFESSIONAL EXPERIENCE

Career Break, Global

July 2025 - Present

- Taking time off to travel the world with my partner and work on personal and creative projects!

Zip, New York, NY

Senior Product Manager, Purchasing

Jan 2024 - July 2025

- Owned product strategy and roadmap for BNPL card issuing platform and virtual card flows, leading end-to-end transaction lifecycle across card creation, auth, refunds, disputes, and card-on-file experiences to optimize consumer checkout performance
- Drove customer experience and authorization initiatives, increasing order confirmation rates by ~35% through pre-auth flows, self-service refund settlement, expanded in-store virtual card acceptance, and improved decline messaging
- Led strategic product launches and platform expansion (Pay in Z, Pay in 2, Groceries), owning go-to-market expansion and cross-functional alignment across product, engineering, risk, compliance, and marketing teams
- Built AI and data-driven product capabilities, including LLM powered merchant categorization and virtual card refund tracking tools, enabling personalized recommendations and product optimization

Remitly, New York, NY

Product Manager, Lending

May 2022 - September 2023

- Product Manager on the New Initiatives team, building and launching two 0-to-1 installment lending products for immigrants to send remittances home from concept ideation to beta launches
- Led the onboarding and identity workstream, launching a new identity verification flow for new and existing users; defined KYC and sanctions requirements and partnered cross-functionally to establish a company-wide, multi-product identity strategy
- Launched a new consumer lending home experience to support discovery, qualification, borrowing, and repayment states
- Defined top-of-funnel acquisition strategy and metrics, partnering with marketing and analytics on messaging tests, attribution tracking, and app discoverability features which drove a 56% increase in early user engagement
- Launched a transactional messaging notification system for loan offers and repayment reminders
- Architected flow of funds and reconciliation processes, leading integrations with bank partners, loan management systems, finance/accounting, and treasury to ensure accurate loan payouts and repayments

Product Partnerships, Passbook/Lending

March 2021 - August 2022

- First partnerships hire on the team: designed framework and led the end-to-end partner selection for a neobank from product requirements and research, due diligence, evaluation, negotiation, contract execution, and initial onboarding of 7 fintech vendors (out of 50+) across money movement, identity/risk, lending, and core payment infrastructure
- Managed ongoing relationships with our bank partners, payment processors, and third-party loan management systems for new product launches, tracking metrics, and ongoing operational support

Uber, San Francisco, CA

Payments Analyst, Uber Money (promoted Mar 2020)

September 2018 - March 2021

- Led global payment partnerships and performance across 10+ banks and processors, defining KPIs, negotiating processing costs, and driving operational improvements to optimize payouts for drivers and restaurants (Regions: US, LATAM, and APAC)
- Defined global strategy for faster payments (RTP, pay-to-card, wallets), aligning cross-functional teams, evaluating market and technical capabilities, and GTM approach
- Built scalable, data-driven payment tools including an auto-approval system for 1M+ weekly payments, an anomaly detection system boosting approval rates +75%, and an alerting & monitoring framework reducing global payment outages ~20%
- Launched a front-end payments configuration tool supporting 300+ payout configurations (time of payouts, bank partners, currency, etc), streamlining processor onboarding and routing changes

Mastercard., New York, NY

Product Manager, Digital Payment Products (promoted Feb 2018)

July 2016 - September 2018

- Product Manager for digital wallet and payment tokenization, leading global data strategy, scalable data architecture, ETL processes, and feature reporting; defined roadmaps and requirements for reporting tools for key bank partners and digital players
- Launched data visualization tools (DOMO, Tableau) with +500% user growth, participated in 3 company-wide innovation challenges (top 5 global finalist for financial inclusion), and filed 3 patents in transit, VR, and IoT

EDUCATION

Cornell University, College of Arts & Sciences, Ithaca, NY

August 2012 - May 2016

Bachelor of Arts in Information Science, Minor in Business
